ABOUT THE COMPANY

WE HAVE BEEN A LEADING PRODUCER OF PIGMENT PREPARATIONS AND ADVANCED BUILDING CHEMISTRY PRODUCTS SINCE 1988. OUR COMMITMENT:

TOP QUALITY PRODUCTS: We offer products of the highest quality at competitive prices, complemented by excellent customer service.

ECO-FRIENDLY SOLUTIONS: Our products are environmentally friendly and undergo rigorous quality control at every stage of production, ensuring unmatched craftsmanship and consistency.

GLOBAL RECOGNITION: We have gained recognition in over 30 export markets, showcasing our range and providing comprehensive technical and logistical support.

DISCOVER OUR PREMIUM PRODUCTS AT REASONABLE PRICES AND JOIN OUR EXTENSIVE BASE OF SATISFIED CUSTOMERS!

PIGMENT MIX

Universal pigment concentrate for water-based paints and most solvent-based paints.

Outdoor use

Indoor use

Light-resistant

CHARACTERISTICS

Universal pigment concentrate in the form of an aqueous dispersion of pigments with added dispersing-wetting agents and viscosity regulators. The PIGMENT MIX concentrate contains no resins, ethylene glycol, heavy metals, volatile organic compounds (VOC), or alkylphenol ethoxylates (APEO). The auxiliary agents used ensure that the PIGMENT MIX concentrate disperses excellently in aqueous systems and most solvent-based systems. PIGMENT MIX concentrates guarantee repeatable, economical solutions. To ensure color accuracy and repeatability, each PIGMENT MIX concentrate is tested in our Quality Control Laboratory. Parameters such as density, viscosity, pH, shade, and color strength are examined.

INTENDED USE

PIGMENT MIX is intended for coloring:

- Ready-to-use paints, enamels, and varnishes used both indoors and outdoors
- Most solvent-based paints and enamels: alkyd (phthalic, oil-phthalic), chlorinated rubber, nitrocellulose
- Gypsum throughout its mass
- Raw wood
- Unglazed ceramics

PIGMENT MIX concentrate is compatible with our other products: FUGAREMIX – grout renovator, GRUNT primer, GLAMOUR EFFECT GLAZE.

MIX-BUD MAX

Pigment Concentrate for Coloring Facade Paints, Plasters, Concrete, Microcement

Outdoor use

Indoor use

Light-resistant

CHARACTERISTICS

MIX-BUD MAX is a pigment concentrate free of any resins, ethylene glycol, heavy metals, volatile organic compounds (VOC), and alkylphenol ethoxylates (APEO). The formula of MIX-BUD MAX concentrate is based on selected inorganic and organic pigments with maximum resistance to light, outdoor conditions, and alkaline environments (lime and cement). The MIX-BUD MAX concentrate disperses excellently in both paints and plasters, as well as in decorative materials based on cement or lime, providing a durable and uniform shade.

MIX-BUD MAX concentrates guarantee consistent, economical colors. To ensure color accuracy and repeatability, each MIX-BUD MAX concentrate is tested in our Quality Control Laboratory.

INTENDED USE

MIX-BUD MAX is intended for coloring:

- Plasters
- Ready-to-use facade paints
- Concretes
- Lime mortars

It is suitable for ready-to-use paints, enamels, and varnishes used both indoors and outdoors.

The maximum addition is 5% of MIX-BUD MAX concentrate per total mass finished product. All colors are suitable for outdoor use.

GLAMOUR EFFECT MOON DUST BIO GLITTER

Indoor use

CHARACTERISTICS

GLAMOUR EFFECT MOON DUST is a decorative glitter designed for use with GLAMOUR EFFECT GLAZE, other water-based lacquers, and transparent dispersion or emulsion paints.

INTENDED USE

- **Creating original decorative effects:** Ideal for interior use on surfaces previously painted with white or colored paints, this product adds unique and decorative finishing touches.
- **Highlighting with a subtle shine:** Perfect for accentuating walls, small fragments, or architectural elements such as recesses or columns by adding a delicate sparkle.

GLAMOUR EFFECT METALLIC GLOW

Indoor use

CHARACTERISTICS

GLAMOUR EFFECT METALLIC GLOW is a decorative paste designed to be used with GLAMOUR EFFECT GLAZE, other water-based varnishes, transparent dispersion paints, or emulsions. The iridescent particles in the paste create a striking visual effect on surfaces that are properly illuminated, making them a strong and interesting highlight in any interior. The coated surfaces achieve a beautiful metallic sheen.

INTENDED USE

- **Creating original decorative effects:** Ideal for interior use on surfaces previously painted with white or colored paints, this product adds a unique metallic glow and enhances the visual appeal of the space

COLOR RANGE

Alaska Silver

Desert Gold

PRODUCT	COLLECTIVE PACKAGING
Glamour Effect Metallic Glow Paste 80 ml	6 pcs.

GLAMOUR EFFECT GLAZE

CHARACTERISTICS

GLAMOUR EFFECT GLAZE is a transparent, single-component varnish that provides high-quality, durable coatings with resistance to abrasion and staining. It is available in two finishes: gloss and matte. The varnish can be used as a standalone topcoat for walls or as a base for decorative effects (GLAMOUR EFFECT MOON DUST glitter, GLAMOUR EFFECT METALLIC GLOW paste, or Pigment MIX concentrate).

INTENDED USE

- **Creating original decorative effects:** Ideal for enhancing the appearance of surfaces with unique effects.
- **Enhancing color depth and saturation:** Provides a glossy or matte finish to the decoration, depending on the selected varnish type.
- **Protective coating:** Creates a protective layer against dirt, making it easier to clean painted surfaces.
- **Suitable for use in rooms prone to soiling,** such as children's rooms, kitchens, hallways, and staircases.
- **Also effective for painting wainscoting.**

DEKOR

DECORATIVE VARNISH

Outdoor use

Indoor use

Light-resistant

CHARACTERISTICS

DEKOR is a water-based acrylic resin lacquer with special effect pigments. It is known for its durability and resistance to external conditions, making it an ideal choice for both indoor and outdoor applications. Its key feature is excellent adhesion to a variety of substrates, allowing it to be used on: **stone, metal, glass, wood, leather, plastic, lettering on gravestones.**

The lacquer forms a scrub-resistant coating, ensuring a long-lasting aesthetic effect. It is waterproof and resistant to atmospheric factors, maintaining its properties even in challenging outdoor conditions. It also has a neutral fragrance.

CHARACTERISTICS

ENAMEL WOOD-METAL is a water-based acrylic enamel with full coverage, providing excellent adhesion to the substrate. Its coating is resistant to weather conditions and dirt, making it suitable for both indoor and outdoor applications. It protects and decorates, maintaining a durable color. The enamel dries quickly and is versatile in use.

INTENDED USE

For decorative and protective painting of:

- **Wooden and wood-like surfaces**
- **Wooden facades**
- **Garden furniture, gazebos, paneling**
- **Metal surfaces**
- **Cast iron elements**

FEATURES

- **Indoor and Outdoor Use:** Suitable for various applications both inside and outside.
- **Protection and Decoration:** Provides both protective and decorative benefits.
- **Water-Based Product:** Environmentally friendly and easy to clean up.

CHALKBOARD PAINT

CHARACTERISTICS

CHALKBOARD PAINT is the innovative product based on a water-based acrylic dispersion, featuring a matte finish.

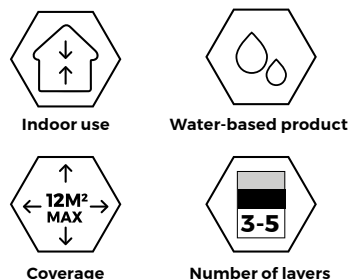

It forms a surface resembling a school chalkboard, on which you can write and draw with chalk and then easily wipe clean with a damp cloth or sponge. It is versatile, abrasion-resistant, efficient, and quick-drying, making application easy and the effect long-lasting.

CHALKBOARD PAINT is designed for protective and decorative finishing of indoor surfaces, including: **lime plasters, cement-lime plasters, mineral plasters, cement, concrete, gypsum, wood and wood-based materials**

CHALKBOARD PAINT enables creative play and is ideal for use in kitchens, restaurants, lecture halls, schools, and children's rooms.

COLOR RANGE / EFFECT

Color: Black
Effect: Matte

MAGNETIC CHALKBOARD PAINT

CHARACTERISTICS

MAGNETIC CHALKBOARD PAINT is a black, water-based paint with a matte finish. Its magnetic properties allow the creation of surfaces that attract magnets and can also be written and drawn on with chalkboard chalk. It is versatile, resistant to repeated wiping, efficient, and quick-drying, making it easy to use and durable in application.

This paint is ideal for use in places such as kitchens, restaurants, lecture halls, schools, children's rooms, and any other space requiring creative development.

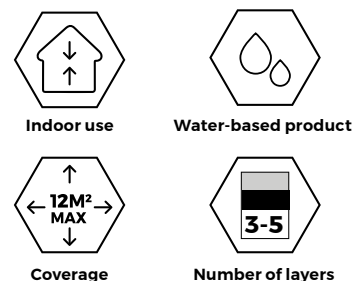

INTENDED USE

For painting:

- Lime plasters
- Cement-lime plasters
- Mineral plasters
- Cement
- Concrete
- Gypsum
- Gypsum boards
- Wood and wood-based materials

COLOR RANGE / EFFECT

Color: Black
Effect: Matte

WALLPAPER REMOVAL SOLUTION

CHARACTERISTICS

WALLPAPER REMOVAL SOLUTION is designed for the easy and effective removal of wallpapers from various materials, as well as for removing adhesive paints. Its advanced formula allows for quick and efficient removal of different types of wallpapers without damaging the underlying surface. The solution is biodegradable and environmentally friendly. Additionally, the product contains silver ions, which have antibacterial and anti-fungal properties, preventing the growth of mold and bacteria on the cleaned surface.

Indoor use

GLAMOUR EFFECT WALLPAPER ADHESIVE

Indoor use

CHARACTERISTICS

The GLAMOUR EFFECT line also includes wallpaper adhesives designed to meet the needs of the most demanding customers. These adhesives are easy to prepare, dissolve quickly, are efficient, and odorless.

Two versions of the product are available: SPECIAL and UNIVERSAL.

INTENDED USE

SPECIAL Wallpaper Adhesive:

- For vinyl, paper, textured wallpapers, and wallpaper types like non-woven on paper or non-woven backing

UNIVERSAL Wallpaper Adhesive:

- A versatile adhesive suitable for all types of wallpapers on paper or non-woven backing

PRODUCT	COLLECTIVE PACKAGING
Glamour Effect SPECIAL Adhesive 200 g	10 pcs.
Glamour Effect UNIVERSAL Adhesive 200 g	10 pcs.

GRUNT -PRIMER

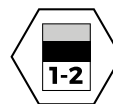

Indoor use

Outdoor use

Coverage

Number of layers

Water-based product

Can be coloured with PIGMENT MIX

CHARACTERISTICS

The one-component PRIMER preparation guarantees proper surface preparation for painting or plastering. Its composition ensures the penetration of the emulsion into the primed substrate, strengthening it, reducing its absorbency, and improving adhesion for paints and plasters.

INTENDED USE

- For priming raw construction substrates (concrete, cement, cement-lime, gypsum)
- For priming old, previously painted surfaces
- Ideal for underfloor heating systems
- Can be coloured with one of the company pigments to facilitate even application on the primed surface
- Excellent for both indoor and outdoor use

PRODUCT	COLLECTIVE PACKAGING
GRUNT MIX 1 L	9 pcs.

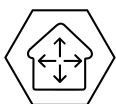

WOOD STAIN VARNISH

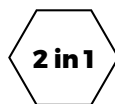

Weather protection

Indoor use

Outdoor use

2 in 1
Protects and decorates

Biological protection

Coverage

Number of layers
2-3

Second layer after 1h

Water-based product

CHARACTERISTICS

WOOD STAIN VARNISH is a high-quality product designed for both decorating and protecting various wooden and wood-based surfaces, such as fences, facades, furniture, gazebos, paneling, and more. This product is specially formulated for use both indoors and outdoors.

WOOD STAIN VARNISH is a versatile product that not only enhances the aesthetic appeal of wooden surfaces by highlighting the natural grain of the wood but also creates a durable coating that effectively protects the wood from external factors such as dirt, moisture, UV radiation, and biological decay. The waxes in WOOD STAIN VARNISH increase the coating's resistance to abrasion and scratching.

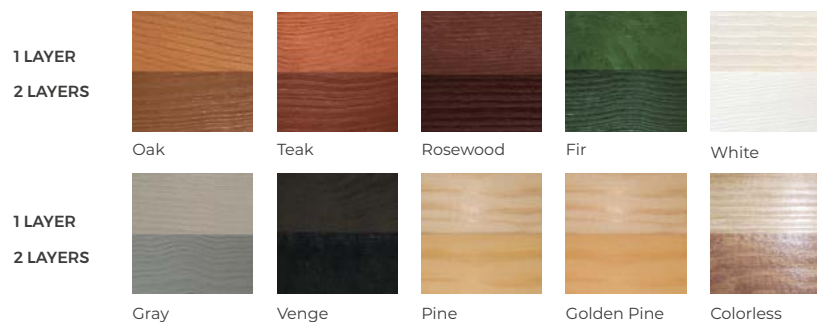

INTENDED USE

For decorative and protective painting of:

- **Wooden and wood-based surfaces**
- **Wooden facades**
- **Garden furniture**
- **Gazebos**
- **Paneling**

Ideal for **protecting raw wood** as well as **renovation painting**.

COLOR RANGE / EFFECT

Effect: satin.

POLYURETHANE YACHT VARNISH

SINGLE-COMPONENT

Weather protection

Indoor and outdoor use

Coverage

Number of layers

CHARACTERISTICS

SINGLE-COMPONENT POLYURETHANE YACHT VARNISH is a protective and decorative varnish developed based on modern formulation. It is designed to protect and decorate wooden surfaces and wood-based materials, particularly those exposed to water contact and strong sunlight. It provides a satin finish („semi-matt”) and can be used both indoors and outdoors, suitable for new surfaces as well as for renovation. It creates a coating resistant to harsh and demanding weather conditions.

INTENDED USE

For painting:

- Garden and balcony furniture
- Gazebos
- Paneling
- Balustrades
- Wooden facades
- Wooden yacht equipment
- Other elements that may come into occasional contact with water, including saltwater

The product can be used as a topcoat over colored WOOD STAIN VARNISH.

COLOR / EFFECT

Colorless / Satin

PRODUCT	COLLECTIVE PACKAGING
Single-Component YACHT Varnish 800 ml	6 pcs.
Single-Component YACHT Varnish 5 L	unavailable

POLYURETHANE YACHT VARNISH

TWO-COMPONENT

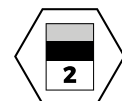

Weather protection

Indoor and outdoor use

Coverage

Number of layers

CHARACTERISTICS

TWO-COMPONENT POLYURETHANE YACHT VARNISH offers a satin finish („semi-matt”) and provides protection against the destructive effects of atmospheric conditions. Once cured, it forms a hard, flexible coating resistant to mechanical damage, scratches, abrasions, and cracks. The coating is particularly resistant to both fresh and saltwater. It works exceptionally well as a final protective layer on epoxy surfaces or other two-component adhesive.

INTENDED USE

For painting:

- Wooden yacht equipment
- Garden architecture
- Balustrades
- Wooden facades
- Other elements exposed to water or sunlight

COLOR / EFFECT

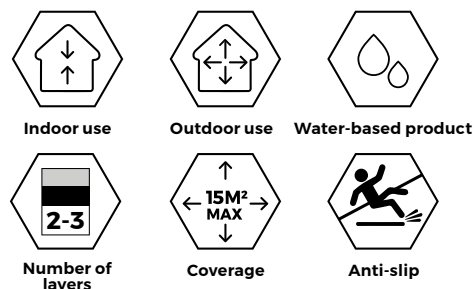

Colorless / Satin

PRODUCT	COLLECTIVE PACKAGING
Two-Component YACHT Varnish 1L Set	6 pcs.
Two-Component YACHT Varnish 5 L Set	unavailable

ANTI-SLIP VARNISH

FOR WOOD: FLOORS AND STAIRS
SINGLE-COMPONENT

CHARACTERISTICS

ANTI-SLIP VARNISH FOR WOOD: FLOORS AND STAIRS is a single-component product based on waterborne acrylic-polyurethane resin, designed for the protection and decoration of wooden floors and stairs. It is resistant to abrasion, dirt, and moisture, providing long-lasting protection and a durable, aesthetic appearance. The varnish creates an anti-slip coating that enhances user safety, particularly in high-moisture areas. It can be applied to new surfaces and for the renovation of existing ones. Additionally, it can be used as a top coat over a colored WOOD STAIN VARNISH product for increased durability and anti-slip protection.

INTENDED USE

For application on:

- Floors
- Stairs
- Balustrades and handrails

Ideal for:

- Bathrooms, Kitchens
- Hallways, Terraces

COLOR / EFFECT

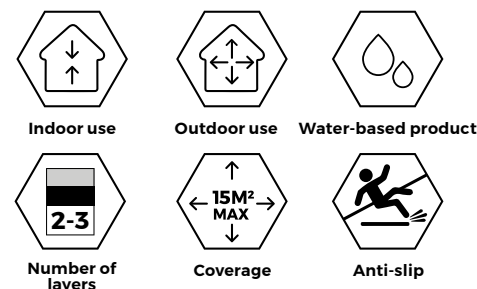

Colorless / Matte, Gloss

PRODUCT	COLLECTIVE PACKAGING
Single-component Anti-slip Varnish for wood 800 ml	6 pcs.
Single-component Anti-slip Varnish for wood 5 L	unavailable

ANTI-SLIP VARNISH

FOR WOOD: FLOORS AND STAIRS
TWO-COMPONENT

CHARACTERISTICS

ANTI-SLIP VARNISH FOR WOOD: FLOORS AND STAIRS (Two-Component) is a high-performance product based on waterborne polyurethane resin. It is designed for the protection and decoration of wooden floors and staircases, providing enhanced safety and durability.

FEATURES:

- **Anti-Slip Properties:** Reduces the risk of slipping - ideal for high-traffic areas.
- **Durability:** Resistant to wear, staining, and moisture, ensuring long-lasting protection.
- **UV and Yellowing Resistance:** Maintains its appearance and properties even under sunlight.
- **Versatility:** Can be used for new applications or as an additional protective layer over WOOD STAIN VARNISH

INTENDED USE

For application on: **floors, stairs, balustrades and handrails**

Ideal for:

- Bathrooms, Kitchens
- Hallways, Terraces

COLOR / EFFECT

Colorless / Matte, Satin, Gloss

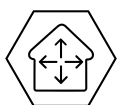

PRODUCT	COLLECTIVE PACKAGING

CONCRETE-FLOOR PAINT

Water-Based Acrylic Paint

Indoor use

Outdoor use

Protects and decorates

Water-based product

Coverage

Number of layers

CHARACTERISTICS

CONCRETE-FLOOR PAINT is water-based acrylic paint specially formulated for painting floors and other concrete surfaces. Its matte finish provides a modern appearance while highlighting the natural character of concrete. Thanks to its innovative formula and high-quality raw materials, the paint ensures excellent adhesion to the substrate and perfect coverage, making painting easy and effective. Its resistance to abrasion ensures that painted surfaces are not only aesthetically pleasing but also durable and easy to maintain. Additionally, the paint protects and decorates, giving concrete floors a fresh and attractive look. Its resistance to dirt and weather conditions makes it suitable for use both indoors and outdoors in areas with moderate pedestrian and vehicular traffic.

INTENDED USE

For decorative and protective painting of:

- Concrete floors and screeds
- Terraces and balconies
- Concrete fences and structures
- Garden paths
- New and refurbished concrete surfaces

ANTI-SLIP VARNISH

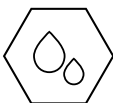

FOR CONCRETE AND MICROCEMENT SINGLE-COMPONENT

Indoor use

Outdoor use

Water-based product

Number of layers

Coverage

Anti-slip

CHARACTERISTICS

ANTISLIP VARNISH FOR CONCRETE AND MICROCEMENT is a single-component product based on waterborne acrylic-polyurethane resin. It protects and decorates the surface, providing excellent adhesion and a durable, abrasion-resistant coating. It protects against moisture, dirt, does not yellow, and is UV resistant. Suitable for both indoor and outdoor use. The varnish creates a slip-resistant surface that significantly reduces the risk of slipping, making it ideal for high-traffic areas and places with increased humidity.

INTENDED USE

For use on:

- Concrete
- Microcement
- Stone
- Resin and mineral flooring
- Epoxy and polyurethane resin surfaces

Ideal for:

- Bathrooms
- Kitchens
- Stairs
- Hallways
- Terraces

POLYURETHANE VARNISH

FOR CONCRETE AND MICROCEMENT

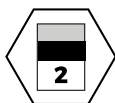

TWO-COMPONENT

Indoor use

Outdoor use

Number of layers

Coverage

CHARACTERISTICS

POLYURETHANE VARNISH FOR CONCRETE AND MICROCEMENT is a clear, two-component, water-dilutable product with a modern formula. Designed to protect all types of concrete surfaces, it boasts high chemical and mechanical resistance. It effectively shields the treated surface from moisture and dirt, including tire marks, and facilitates the maintenance of cleanliness. Ideal for protecting heavily used concrete surfaces, walls, floors, and large-scale flooring.

INTENDED USE

Suitable for painting:

- Anhydrite and epoxy concrete screeds
- Cement screeds, underlayments, and leveling compounds
- New and renovated concrete surfaces
- Sanded and painted surfaces
- Microcement

Example applications:

- Utility rooms, garages, and basements
- Industrial and public utility facilities
- Private buildings
- Commercial and warehouse spaces
- Service workshops
- Traffic routes, stairs, halls, and corridors

COLOR RANGE / EFFECT

Colorless. Effect: Matte, Satin, Gloss.

PUR ENAMEL

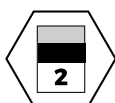

FOR CONCRETE, MICROCEMENT, AND POROUS SURFACES

Indoor use

Outdoor use

Number of layers

Coverage

CHARACTERISTICS

PUR ENAMEL is a high-quality, polyurethane-based enamel designed for the protection and decoration of concrete, microcement, and porous surfaces. It is suitable for both indoor and outdoor use, offering a durable finish with excellent adhesion, chemical and mechanical resistance. It effectively protects surfaces from moisture, stains, and UV radiation, enhancing their aesthetic appeal while ensuring long-lasting durability.

INTENDED USE:

For surfaces like:

- Concrete floors
- Anhydrite and epoxy concrete screeds
- Cement screeds, underlayments, and leveling compounds
- New and renovated concrete surfaces
- Microcement surfaces
- Porous surfaces like unpolished stones, clinkers, bricks

Example applications:

- Utility rooms, garages, and basements
- Industrial and public utility facilities
- Private buildings
- Commercial and warehouse spaces
- Service workshops
- Traffic routes, stairs, halls, and corridors

EPOXY PAINT

Durable Coating for High-Traffic Surfaces.
Self-Hardening / Water-Dilutable / Damage-Resistant
Vapor-Permeable

Indoor use

Number of layers

CHARACTERISTICS

EPOXY PAINT consists of two components: A and B, which, when mixed and applied to a surface, form a durable, stain-resistant, and damage-resistant coating with excellent adhesion to the substrate. It features high hardness, resistance to scrubbing, and mechanical damage. The paint provides chemical resistance to the substrate. It is recommended for protecting floors in areas with heavy mechanical load, including pedestrian traffic, vehicle paths, and forklift traffic (vehicles with rubber tires), such as basements, garages, corridors, parking lots, halls, warehouses, technical rooms, and all high-traffic areas.

Due to its vapor permeability properties, EPOXY PAINT is also suitable for protective and decorative painting of walls and ceilings in areas with increased humidity.

INTENDED USE

Applicable on surfaces types: **concrete, self-leveling screeds, plaster, other substrates (floors and walls) subject to mechanical damage, difficult-to-remove stains, or dampness.**

Recommended for:

- Utility rooms, garages, and basements
- Industrial and public utility facilities
- Private buildings
- Commercial and warehouse spaces
- Service workshops
- Corridors, stairs, halls, and other high-traffic areas

NOTE: For indoor use only.

GROUT RENOVATOR

RENOVATED GROUT

Indoor use

Can be coloured with PIGMENT MIX

CHARACTERISTICS

GROUT RENOVATOR is designed to restore and refresh grout lines, giving them new revitalized appearance. This product is ideal for both renewing the look of existing grout and improving the overall aesthetics of tiled surfaces.

INTENDED USE

- **Rejuvenating Old Grouts:** revives and enhances the appearance of faded or discolored grouts

FEATURES

- **Restores Appearance:** Enhances the color and uniformity of grout lines.
- **Improves Aesthetics:** Gives a fresh, clean look to old and worn grout.
- **Easy Application:** Simple to apply with a brush or applicator, allowing for precise application.
- **Durable Finish:** Provides a long-lasting result that resists dirt and stains.

NOTE: do not use for clinker and unglazed stoneware.

COLOR RANGE

Ready colors: White, Gray, Dark Gray, Black.
Any color can be obtained by adding the PIGMENT MIX concentrate to white GROUT RENOVATOR product.

PRODUCT	COLLECTIVE PACKAGING
Grout Renovator white 100 ml	10 pcs.
Grout Renovator color 100 ml	6 pcs.

INSTRUCTION FOR USE

- Clean the grout lines thoroughly to remove any dirt or residue
- To change the product color add the Pigment MIX concentrate
- Shake the applicator well
- Perform a test run of the product on a smooth surface
- Apply the product for the grout step by step, by each 1 m² of tiles
- Wait 30 min.
- Remove the excess of the product with the rough side of the sponge

GROUT RENOVATOR 100 ml + PIGMENT MIX concentrate

10 ml 5 ml

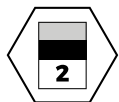

EMALMIX

Enamel for fast repair of surface defects

Indoor use

Number of layers

CHARACTERISTICS

EMALMIX is a specialized enamel designed to create white coatings with a durable gloss finish. The surface coated with this enamel offers enhanced resistance to abrasion, cracking, scratching, and peeling.

INTENDED USE

EMALMIX is intended for repairing:

- **Sink Surfaces: including kitchen and bathroom sinks**
- **Washbasins and Bathtubs: ideal for touch-ups and refinishing**
- **Appliances: such as refrigerators and washing machines**
- **Other Lacquered Surfaces: suitable for various other painted or lacquered surfaces**

FEATURES

- **Durable Gloss:** provides a long-lasting, glossy finish
- **Enhanced Resistance:** offers superior protection against wear, cracking, and scratches
- **Versatile Use:** effective for repairing and maintaining a variety of surfaces

Number of layers

CHARACTERISTICS

LAMIX IMPREGNATOR is a penetrating agent that guarantees reliable protection against stains such as oil, grease, coffee, and tea. The product bonds with the impregnated surface and, without altering its color, creates an invisible barrier. It does not contain silicones, allowing the grout to “breathe.” The impregnant can be used both indoors and outdoors.

INTENDED USE

Designed for the impregnation of cement grouts between tiles and ceramic surfaces in:

- **Kitchens: to protect grout from kitchen spills and stains**
- **Bathrooms: to safeguard grout in wet environments**
- **Hotels: for maintaining clean and protected grout in high-traffic areas**
- **Vacation Homes and Spas: to ensure long-lasting protection in leisure and wellness environments**
- **Sanatoriums, Guesthouses, etc.: ideal for various hospitality and health facilities**

FEATURES

- **Reliable Stain Protection:** guards against common stains without changing the surface color
- **Invisible Barrier:** forms a protective layer that is not visible but effective
- **Breathable:** allows the grout to retain its ability to breathe
- **Versatile Use:** suitable for both indoor and outdoor applications

WALL TILE PAINT

Quality Coverage
Number of layers Ecological product

CHARACTERISTICS

WALL TILE PAINT is a two-component formula based on water-based polyurethane resin designed for renovation and protection of various ceramic surfaces indoors. It provides effective protection against moisture and dirt. The paint forms a washable coating that is resistant to neutral detergents, cleaning agents, oils, and other contaminants, helping the surface to maintain clean. It is user-friendly and creates a smooth surface with an excellent decorative effect.

FEATURES

- High mechanical and chemical resistance

INTENDED USE

Ideal for renovating wall tiles in kitchens, hallways, or rooms. Suitable for painting: ceramic tiles, glazed tiles, gres, clinker, terracotta, sandstone, gypsum tiles, and decorative strips.

COLOR RANGE / EFFECT

Anthracite Ash Gray Soft Beige
White Black Effect: Satin

PRODUKT	COLLECTIVE PACKAGING
Wall Tile Paint 800 ml Set (component A+B)	6 pcs.

FLOOR TILES AND SHOWER CABIN PAINT

Quality Coverage
Number of layers Ecological product

CHARACTERISTICS

This two-component paint, based on waterborne polyurethane resin, is designed for the renovation and protection of various ceramic surfaces inside buildings. It provides effective protection against moisture and dirt, making it ideal for use on walls in shower cabins and floors exposed to high humidity and frequent soiling.

The paint gives excellent coverage and an elegant and modern look due to its satin finish. It forms a washable coating resistant to neutral detergents, cleaning agents, oils, and other contaminants. It is easy to use and ideal for renovating wall tiles in bathrooms and other moisture-prone areas.

INTENDED USE

For painting: ceramic tiles, glaze, stoneware, gres, clinker, terracotta, sandstone, gypsum tiles, and decorative strips.

COLOR RANGE / EFFECT

Anthracite Ash Gray Soft Beige
White Black Effect: Satin

Floor Tiles and Shower Cabin Paint 800 ml Set (component A+B)	6 pcs.

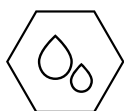

IMPREGNANT FOR STONE, CONCRETE, AND PAVING STONES

Indoor use

Outdoor use

Water-based product

Vapor permeable

Stain protection

Weather protection

CHARACTERISTICS

The IMPREGNANT FOR STONE, CONCRETE, AND PAVING STONES is a water-based solution based on innovative fluoropolymer technology. With its formulation free from organic solvents, it is safe for both users and the environment. It forms a durable and transparent barrier that effectively protects surfaces against water, oil, and dirt absorption. Additionally, the impregnator provides protection against stains from oils, coffee, juices, wine, and more. Its vapor permeability allows the substrate to „breathe,” making it suitable for both indoor and outdoor applications. A key feature of this product is that it does not alter the natural appearance of the substrate, does not yellow, and does not form a film.

INTENDED USE

For the protection of various building materials, including:

- Natural stones
- Paving stones
- Terracotta
- Concrete
- Bricks, etc.

MIXSTONE

Outdoor use

Indoor use

Light-resistant

CHARACTERISTICS

MIXSTONE is a water-based, quick-drying lacquer used primarily in gravestone lettering. It is environmentally friendly as it does not contain toxic compounds. Resistant to light and weather conditions, it performs excellently outdoors. MIXSTONE guarantees a unique effect and, once dry, provides a durable, scrub-resistant coating.

INTENDED USE

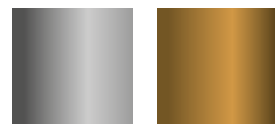

- **Professional Gravestone Lettering:** ideal for painting inscriptions and designs on gravestones
- **Memorial Stone Plaques:** suitable for creating inscriptions on stone memorials
- **Decorating Stone Monuments:** perfect for enhancing the appearance of stone monuments
- **Stone Ornamentation:** useful for adding decorative elements to stonework

Impregnant for stone graves 250 ml	6 pcs.

NEW

CHARACTERISTICS

IMPREGNANT FOR STONE GRAVE MONUMENTS is a water-based solution using innovative fluoropolymer technology. It is organic-solvents-free formula, making product safe for both users and the environment.

FEATURES

- **Transparent Protective Barrier:** a clear protective layer that not only enhances the appearance but also protects the surface of gravestones
- **Water and Oil Resistance:** prevents the absorption of water, grease, and dirt, effectively protecting stone grave monuments from stains
- **Maintains Natural Appearance:** does not alter the natural look of the stone, preserving the original aesthetic of the grave monuments
- **No Yellowing or Coating Formation:** does not yellow or form a coating on the stone surface, ensuring lasting protection without compromising aesthetics
- **Versatile Application:** suitable for grave monuments made from various materials such as granite, marble, terrazzo, and other stones
- **Protection from External Factors:** rain, frost, moss, and other harmful atmospheric factors, contributing to the preservation of their appearance and durability
- **Ease of Use:** easy to apply, on both new and older gravestones, providing comprehensive protection
